

Free AI & Data Science Course

Offered by Matsuo Lab at the University of Tokyo

The “Global Consumer Intelligence Course,” offered by the Matsuo Lab, is designed to nurture the next generation of AI professionals with essential skills, including digital proficiency and hypothesis-driven thinking. It also aims to provide foundational knowledge of AI and its applications in marketing.

- Duration: April 8- July 8, 2026 (14 sessions, online)
- Contents: Python, Machine Learning, Data Science, SQL, Marketing & Business Applications
- Style: Weekly live/recorded lectures, homework, competitions, and final project (Learning support available)
- For all levels and all schools (Python background recommended, but not required)

Advantages :

-  Gain skills in AI, Data Science & Marketing
-  Receive an official certificate of completion — a valuable asset for future job hunting and career development
-  Join a global network of 2,000+ students from 40+ universities worldwide
-  Outstanding students may be invited to join research projects and a campus tour in Japan

Four outstanding Zimbabwean students who took the course last year are visiting Japan this March!

Registration Deadline

March 2nd (Mon)

09:00 AM (CAT)
