

2026 SHORT COURSES TRAINING SCHEDULE

The Environmental Management, Renewable Energy and Climate Change (EMRECC) Centre of Excellence at Harare Institute of Technology (HIT) invites you to build the expertise that Zimbabwe's future demands. With six intensive short courses launching in 2026, there has never been a better time to invest in your green career.

OUR MISSION:

To drive the green revolution through environmental education and innovative research, and to build sustainable, low-carbon cities across Zimbabwe by 2030.

2026 TRAINING SCHEDULE

	Course	Level	Duration	Fee (USD)
	Climate Change Adaptation & Mitigation	Certificate	5 days	USD 500
	Occupational Safety, Health & Environmental Management (OSHEM)	Certificate	5 days	USD 500
	Environmental Social Impact Assessment (ESIA)	Certificate	5 days	USD 500
	Safety, Health, Environment & Quality (SHEQ)	Certificate	5 days	USD 500
	Renewable Energy	Certificate	5 days	USD 500
	Environmental & Waste Management	Certificate	5 days	USD 500

WHO SHOULD ATTEND?

Whether you are an engineer navigating complex site conditions, a researcher pushing the frontiers of environmental science, a student laying the foundation of a green career, or an industrialist seeking to align your operations with Zimbabwe's Vision 2030, these courses were built with you in mind.

- Engineers & technicians working in environment-sensitive industries
- Scientists and environmental researchers
- Water and sanitation personnel

- Students pursuing environmental and engineering disciplines
- Industrialists seeking regulatory compliance and best practice
- Policy, compliance, and SHEQ teams in public and private sectors

EMRECC also offers tailor-made training programmes to address specific organisational and industrial technology needs.

LECTURE FORMAT

In-Person

Face-to-face sessions at HIT's Innovation Hub - collaborative, immersive, and expert-led.

Online

Full course experience delivered virtually - learn from anywhere in Zimbabwe or beyond.
